

FFCApplicationNote-ShieldedFFCWithDrainwire (20/08/2015 16:30:21)

Nicomatic has created a new value-added option for shielded FFC called the Drainwire. The Drainwire is used for better grounding isolation. The new option has been manufactured for a company that sells medical refrigerators. It will be used in touch screen for blood bank refrigerators. This application will allow for blood banks to closer regulate the temperature of the refrigerator, thus allowing for better protection of the blood
