SALON LE BOURGET 2009– STAND 4F-89

NICOMATIC AIMS FOR EN9100

Nicomatic announces its policy to achieve the EN 9100 certificate by the end of 2009. Indeed, one of the company's priorities is to further develop their interconnect solutions for the avionics and space field.

Olivier Nicollin, Nicomatic's CEO, said: "One of the few existing methods to reach a strong long-term position in this field is to fully invest oneself by clearly placing the company in the aeronautics."

More than a simple label, the EN 9100 certifies the development of a quality system in permanence directed at the improvement of systems, products, services and performances.

Olivier NICOLLIN,
NICOMATIC CEO

Olivier Nicollin said: "The first benefit that we will certainly gain from the EN 9100 is to be recognised worldwide as a partner of choice to the aerospace industry, and that is our goal."

The EN 9100 European standard includes ISO9001:2001 quality management system requirements and specifies 30% additional requirements for the aerospace industry. It is applicable to OEMs, but also increasingly applicable to suppliers like Nicomatic.

About Nicomatic :

Company specialised in the development, design and manufacturing of innovative interconnect solutions and components for man/machine interfaces. Nicomatic counts 170 people, achieved a consolidated turnover of 18,2 million € in 2008 (80% is export, sales in 40 countries), has a network of 3 subsidiaries and 20 partners in the world. Headquarter is located in France in the region of Haute-Savoie, (Bons-en-Chablais) close to the Lemman lake and Geneva.

About EN 9100 :

EN 9100 has become an international quality management standard for the aerospace industry, including all manufacturers from IAQG (International Aerospace Quality Group) and the supply-chain. Being certified allows to be referenced in the OASIS database (On Line Aerospace Suppliers Information Systems).
