Join the Initiative !
Regenerative Materials for the Electronics Industry.

Project led by:

NICOMATIC HARWiN

Project operated by:

The New Materialist

July 2024

Nicomatic x Harwin. Initiative for Regenerative Materials.

Nicomatic (FR, Alps) and Harwin (UK, Hampshire) are two leading companies in connector manufacturing.

They believe their business must enforce the resilience of local economies and natural ecosystems.

They have teamed up with The New Materialist to emerge Regenerative Materials from Alps & Hampshire, for the future of the Electronics Industry.

The Regenerative Materials are:

Made from local by-products.
Natural & Non-Toxic.
Performant.
Scalable.

The New Materialist

The Material Design Pathway

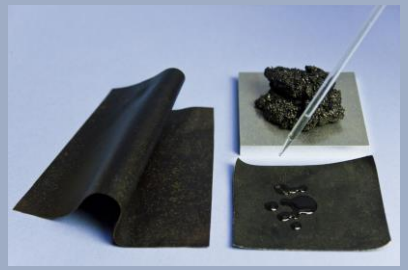

Kick-Off.
July 5th 2024

Explore Chablais (Alps).
Oct 29 & 30, 2024

Explore Hampshire.
Nov 26-28, 2024

Design Materials.
Dec-Jan 2025

Scale-up Strategies.
January 2025

The New Materialist

Explore
Hampshire & Chablais (Alps)

We meet players in both Hampshire & Chablais to collect resources, understand the stakes, assess industrial capacities and integrate territorial logics.

The New Materialist

Design Regenerative Materials

Emerging Materials Designers from The New Materialist
team up with stakeholders in the Hampshire & Chablais ecosystems
to transform collected resources into potential material innovations.

The New Materialist

Scale-up Strategies.

The New Materialist will present over 30 samples of potential regenerative material innovations applicable to insulators.

The next step of material development will be imagined.
