- ☒ Share full transparency by giving a maximum of visibility regarding substances used in our products.
- ☒ Inform on regulation updates impacting our products.
- ☒ Provide dedicated support to our customers.

According to article 33 of the REACH Regulation, any supplier of article with SVHCs in a concentration above 0.1% weight by weight shall provide enough information to allow safe use of the article including, as a minimum, the name of that substance.

As far as we know, following our collection process, which provides us with the most comprehensive view of our supply chain, some of our products are concerned by the following SVHC (see table below).

NICOMATIC is currently working to sustain its standards and can share its roadmaps on:

- ☒ Contact copper alloy without lead.
- ☒ Technical solutions without the use of Cadmium CrVI coating.
