

Export Control Regulations

ITAR/EAR

Valid for 2020

To Whom It May Concern

The ITAR and EAR restrict the export of products and technical data from the US, and control the re-export of such products and technical data after the point of export.

This is to certify that none of NICOMATIC part numbers is submitted to US export controls and therefore affected by ITAR/EAR regulations.

Our products are in the category “Not controlled” and the country of origin is always France.

None of the NICOMATIC parts is a dual usage part.

Sincerely,

NICOMATIC SA
Olivier NICOLLIN
CEO
