NICOMATIC is certified ISO9001:2008 / EN9100:2009

- Easy to use
- Simple & quick change of tooling, easy set up
- Up to 36 contacts crimped in one stroke

REFERENCE

PNEUMATIC PRESS 10500-SA(P)

GENERAL SPECIFICATION

The machine aims at selecting and crimping male or female NICOMATIC contacts CRIMPFLEX® type on jumpers or flexible circuits semi-automatically.

Male contact P/N: 10241 / 10167 / 10067 / 11612 / 13595

Female contact P/N: 11506 / 10025 / 14106

Square male contacts: 12410

The number of contacts to be crimped is selected manually and can vary from 2 to 36. The jumper or flexible contact presentation is made manually by the operator as well as the cycle starting up.

The contacts are moved into the tool automatically according to graduated positions on the rotative cylinder, corresponding to the required number of contacts to be crimped. This machine is also equipped with a downcounter, which allows pre-selecting a precise number of operations and stops automatically once it is back to zero. The press is operated by foot pedal. Crimping of 2 to 36 points in standard.

USE OF TOOLINGS

 $\begin{array}{l} \text{Male tooling for: 10141, 10241, 10067, 10167, 12887} \\ \text{Female tooling for: 10025, 11506, 11612, 13595, 14106} \end{array}$

Male tooling for square male contacts: 12410
